#### Institut Agro Montpellier, a Prestigious School

Since 2020, Institut Agro Montpellier (former Montpellier SupAgro F MONTPEL10) is part of l'Institut Agro (F PARIS487), a leading French higher education institution focused on the convergence of **Food, Agriculture and the Environment**.

**Its mission is to contribute to education, research and innovation and promote international collaborations and intercultural dialog to foster agroecological and digital transitions of both production and food systems under climate change.**

Institut Agro Montpellier offers courses in **Agriculture, Agri-Food Science, Environment and Rural Management and is specifically dedicated to innovation in Mediterranean, tropical and sub-tropical issues.**

Students benefit from **an outstanding scientific environment:**

- **MUSE, Montpellier University of Excellence:**

Institut Agro Montpellier is a member of MUSE, one of the world's most innovative scientific communities in three key fields: Agriculture, Environment and Health.

- **Agropolis International:**

Institut Agro Montpellier is a member of this Montpellier agronomic cluster, with 112 research units and 2,200 researchers in agriculture, food, environment and biodiversity.

- **The Consultative Group on International Agricultural Research (CGIAR) Headquarters** setting in Montpellier fortifies the leadership position of Montpellier's agronomic research at a worldwide level.

- **1,700** students (**29%** from foreign countries)
- **88** academic staff and **345** external lecturers

## FEAT – FLOW

22 May-16 June 2023  
(to be updated for 2023-24)

[More information](#)

Over a period of 4 weeks (*May 22<sup>th</sup> - June 16<sup>th</sup> 2022*), the Major Industrial Challenges in France will be studied in three major scientific fields:

- FEAT - Food, Wine and Water
- SEM - Sustainable Energy and Materials
- DIP - Data and Information Processing

In parallel to the scientific program, FLOW offers students a cultural immersion in the Occitanie region, with visits to its emblematic places, as well as learning the basics of French (gastronomy and culture).

### Scientific courses

- lectures, labs + scientific visit
- 64h - 4 ECTS

### Tutored cross-disciplinary project on sustainability project management

- 12h - 1 ECTS

### French courses + social and intercultural programme

- 24h - 1 ECTS

# Institut Agro Montpellier 2023-2024

## INTERNSHIP

- International students can apply for a research internship in one of the 21 Institut Agro Montpellier **Joint Research Unit (UMR)**.
  - Students must personally take steps to find the internship. For that, they should consult the list of the UMR, at the end of this document and/or consult the UMR websites  
<https://en.institut-agro-montpellier.fr/research/scientific-policy/research-units> (English)  
<https://www.institut-agro-montpellier.fr/recherche/dispositifs-de-recherche> (French)
  - Students should send a message to the contact persons of the chosen UMRs of interest, and indicate the period they are interested in and the topics they would like to work on.
  - The application may be accepted if the project is compatible with the work in progress and the availability of the targeted research teams.
- Internship can begin **at any time of the year**.
- Internships can last **from a few weeks to 6 months**. If the internship lasts more than 2 months, students are paid. This type of long internship is more difficult to obtain.
- Proficiency is required **in French or in English**. In some cases, other languages can be accepted.

### **UMR Eco&Sols – Functional Ecology & Biogeochemistry of Soils**

The aim of Eco&Sols is to use ecological engineering to propose scientifically-based practices to maintain and improve the agricultural and environmental functions of agro-ecosystems. The research undertaken by Eco&Sols seeks to describe and understand the ecological processes of primary production and the regulation of the carbon and nutrient fluxes in the agro-systems.

### **UMR LISAH - Laboratory for the Study of Interactions between Soil, Agro-Systems and Water Systems**

LISAH focuses its work on hydrology, the transfer of contaminants and erosion of highly developed and cultivated soils. It also studies the spatial proprieties of these areas, and their evolution. These studies aim at analyzing the issues of water and soils in cultivated areas.

### **UMR LSTM – Tropical and Mediterranean Symbioses Laboratory**

LSTM studies microbiology and biology of plants, based on a multidisciplinary and integrative approach. It aims at understanding the molecular mechanism influencing the establishing of symbioses, as well as their role in ecosystematic services. It also studies the biodiversity of symbiotic microorganisms.

### **UMR ABSys - Biodiversified Agrosystems**

ABSys supports the agroecological transition by producing knowledge and methods for the assessment and design of tree crop-based cropping systems, including agroforestry systems, in a wide range of Mediterranean and tropical environments.

### **AGAP Institute – Genetic Improvement & Adaptation of Mediterranean and Tropical Plants**

AGAP Institute produces, collates and shares knowledge, methods and technologies on genetics, physiology and evolution of cultivated plants, as well as innovative and collective management strategies. The objective is to create a diversity of crop varieties and to promote plants adapted to the diversity of Mediterranean and tropical agriculture. About 20 tropical and Mediterranean crops are studied, covering a very wide range of biological characteristics and uses. Considering the diversity of plants and their multiple uses as an opportunity, AGAP aims to impact the development of more efficient agroecosystems, through multidisciplinary approaches.

### **UMR PHIM – Plant Health Institute Montpellier**

PHIM studies the interactions between the plant and its biotic environment that have an impact on plant health, growth and productivity. Several of our researchers are located in Kenya, Ivory Coast, French Guyana and Costa Rica. We also have research platforms in Burkina-Faso, Cambodia and China.

### **UMR CBGP - Centre for Biology and Management of Populations**

CBGP carries out research in the fields of systematics, genetics and ecology of natural populations and communities of animals (mainly arthropods and small mammals), for the purposes of agriculture, public health and biodiversity. It aims to characterize the diversity of these organisms, and to understand and predict their evolution in a context of global changes. The results of some of these research programs contribute to the development of decision support tools for pest and disease management or for the conservation of threatened species.

### **UMR LEPSE – Ecophysiology Laboratory of Plants under Environmental Stress**

LEPSE produces methods and knowledge to help maximizing crop production with less input, essentially water. This objective was initially assigned in the context of the necessity to limit water use by agriculture. Ongoing climate change, with global temperature elevation, increased probability of heat waves and drought episodes have led us to widen our domain of research.

### **CEFE – Centre for Functional and Evolution Ecology**

CEFE is currently the largest French research center in Ecology and Evolutionary Biology. Its mission is to perform independent, fundamental scientific research on the dynamics and evolution of biodiversity, planetary environmental change, and sustainable development. CEFE works at a great variety of field sites around the world, but developed particular expertise in Mediterranean and tropical ecosystems. Its main objectives are to understand the dynamics and functioning of ecological systems, and to develop scenarios on their evolution as well as strategies for their conservation and their restoration

### **UMR G-EAU - Water Management, Actors, Uses**

G-EAU conducts researches on hydrosystems, from physical description to integrated water management; it contributes to the design and evaluation of facilities to develop innovating solutions and policies for improved water management. The unit is strongly involved in the UNESCO water center ICIREWARD and hosts many students from the MSc programme Water Sciences ('Water and Agriculture' and 'Water and Society') for their research internships

### **UMR IATE – Agro-Polymer Engineering and Emerging Technologies**

IATE is active in the field of agrifood and green chemistry. It comprises seven research teams who generate knowledge regarding the structural-functional properties of plant-based products upon transformation to food, biomaterials, biomolecules and bioenergy. Societal challenges, such as food security and a transition towards a bio-based society, serve as fuel for creativity and new research activities.

### **UMR SPO – Sciences for Enology**

SPO is involved in research in enology. It comprises 3 research teams: Adaptation, Diversity, Ecology of yeasts (ADEL), Alcoholic fermentation: Yeasts, Aromas, Metabolism (FLAM), Biomolecules of enological interest (BIO). Close interactions with the INRAE Experimental Unit of Pech Rouge-Narbonne (UE PR) allow the development of research projects up to pilot or pre-industrial scale and provide unique opportunities for innovation and transfer.

### **UMR INNOVATION – Innovation and Development in Agriculture and Agri-Food Sector**

The mission of INNOVATION is to inform private and public actors' decision-making by producing knowledge on the processes of innovation and development in agricultural and food systems. Its research focuses on innovation processes, ranging from understanding the objectives of the actors wanting to innovate to analyzing innovations' impact on development. Its research also covers the methods required to support the actors who innovate.

### **UMR MoISA – Montpellier Interdisciplinary center on Sustainable Agri-food systems (Social and nutritional sciences)**

MoiSA gathers researchers and lecturers in social sciences and nutrition from CIRAD, INRAE, IRD, Institut Agro Montpellier and Ciheam-IAMM, under Muse (Montpellier University of Excellence). We research stakeholders' strategies and behaviour in the agri-food systems of Mediterranean and tropical areas, and their results in terms of food security and sustainable development. The main disciplines of research are in social sciences: micro-economics, economics of organization, management, sociology, anthropology, political science); and public nutrition.
